

# Window Bubble™ Request for Prices.

# For Masonry or Wood Window Wells

Please use the reverse side for metal window wells

1. Check the style of **masonry** or **wood** well you have. (Note: For metal wells, use the other side of this sheet.)
2. Does your well have a metal grate?  Yes  No. If yes, please indicate this with a check (✓) on the grid below, and send a photo.
3. Measure the inside width of your window well (A).
4. Measure how far the well projects out from the house wall (not the window) to the inside edge of the well top (B).

## Rectangular Well Style

## Circular Well Style

Getting an exact quote for custom-cut Window Bubbles™ is easy. Just follow these simple steps...

**A. Check your name and address information below and make any corrections.** If not already there, please give us your daytime phone, evening phone, fax number and e-mail address, if any. We will phone you only if we have questions regarding your well measurements. No salesperson will call.

Name: \_\_\_\_\_ Day Phone: (\_\_\_\_) \_\_\_\_\_

Address: \_\_\_\_\_ Evening Phone: (\_\_\_\_) \_\_\_\_\_

City: \_\_\_\_\_ Fax\*: (\_\_\_\_) \_\_\_\_\_

State: \_\_\_\_\_ Zip \_\_\_\_\_ \*Should we call before faxing: Yes No

E-Mail: \_\_\_\_\_

**B. Measure and fill in the measurements on the grids so we can determine the model and size(s) you need.** Measure as accurately as possible, and **DO NOT ALLOW** any extra. We will provide Window Bubbles with adequate coverage. **If your window wells are different than any shown, send us a drawing with the dimensions clearly marked. (A paper pattern or photo is helpful to explain unusual situations.)** Please be sure to mention any wires, pipes, spigots, etc which protrude from or around the window wells. Sorry, we cannot give quotes over the phone.

## House Wall

Please check one:

- Brick  Stone  
 Stucco  Siding

If wood, aluminum or vinyl siding, measure (F) the distance from the well top to the 1st course of siding, (G) the distance from the well top to the 2nd course of siding, and (H) the amount the siding overhangs the wall.

See the other side of this sheet if you have metal wells.

Well #	1	2	3	4
1st Course				
2nd Course				
Over-hang				

## Well #1 #2 #3 #4

A	B	WH	X	Y	Qty	Well Grate (✓)

Enter measurements in the grid below. If you have wells of different sizes, use extra spaces #2, 3, 4. Please specify the quantities of each size well you need covered. If a well has a metal grate, please put a (✓) in the bottom row of the grid.
