

Egress Metal Window Wells

Window wells that are being used for egress must have covers designed which will allow full access to the window and the well. Since all situations are different, it is necessary for us to have additional information before fabricating a unit for your well. Please answer the questions below and return this form to us. This will allow us to make a final recommendation as to the size and design of the cover needed for your well. Please note that any recommendation needs to be approved you your building inspector to be sure your local egress building codes are being followed.

Customer ID# _____ **(from top right corner of quote)**

Bubble ID# _____ **(located next to size of cover on quote)**

1. Is your well used for Egress? (circle one) **Yes** **No**

2. How does the basement window open? (circle one)

In

Slides side to side

Opens Up & Down

Hinged at side & opens out*

*If your window is hinged on the side and opens out we will need the following dimensions.

a. Open the window fully. Measure the total projection of the window from the foundation.

b. Measure the height of the window above ground level outside the well.

3. Which of the following reflects your basement window? (circle one)

Window is flush with foundation

Window/frame are recessed in foundation

Window/frame protrude from foundation

4. If you home has siding, please be sure you have included these dimensions on the measuring form and that all dimensions were taken from ground level and not from the metal rim.

5. Please measure the rim height above ground level. _____

6. Any additional comments or concerns are always welcome.

7. Please provide us with several photos of your well. Photos may be e-mailed to quotes@windowbubble.com.

**This information will allow us to design a cover which will fit properly and allow full access to the window and well.
Please check your local building codes to be sure this recommendation is suitable for your area.**
